Forensics is dedicated to working with Florida’s law enforcement agencies to solve violent crimes in Florida, using forensic science, emerging technology, and innovative crime scene methods to help identify missing, endangered, exploited, and unidentified persons.
The **Center for Drug Discovery and Innovation (CDDI – P3)** is a Florida Center of Excellence, coordinating infrastructure and collaborative connectivity to the USF drug discovery research community.

CDDI – P3’s mission is to assist research groups in overcoming early phase drug discovery challenges by connecting researchers to campus-wide core facilities containing specialized equipment and expertise not available in most research laboratories.

CDDI – P3 operates on the principle that success is best achieved through active collaborative partnerships in a setting that trains individual researchers to work independently, returning to their home laboratory with new skills and knowledge gained in their CDDI – P3 experience.
The University of South Florida’s CVAST works to document, preserve, and protect the world’s cultural and natural heritage through the use of digital visualization, geospatial technologies, informatics, and 3D virtualization.
CSL coordinates accessible and available STEM learning opportunities for educators and students at all levels by tapping into community resources, the university at large, and an extensive and established network of professionals developed through ongoing collaborative relationships.
The Humanities Institute encourages important research in the Humanities by providing summer grants for Humanities-focused research projects. The Institute fosters a broad and inclusive definition of Humanities to include scholarly contributions in language, literature, history, jurisprudence, philosophy, archaeology, religion, ethics, arts, and humanistic social science.
